PLANT SCIENCE

Volume contents

Volume 100 (1994)

Editorial 1

PHYSIOLOGY AND BIOCHEMISTRY

Expansion of potato cells in response to jasmonic acid
K. Takahashi, K. Fujino, Y. Kikuta, Y. Koda (Sapporo, Japan) 3–8

Transgenic tobacco plants that overproduce cytokinins show increased tolerance to exogenous auxin and auxin transport inhibitors
Y. Li, X. Shi, T.J. Strabala, G. Hagen, T.J. Guilfoyle (Columbia, MO) 9–14

Influence of pretreatments with inhibitors of putrescine synthesis on polyamine metabolism and differentiation processes of maize calluses
J.M. Torné, I. Claparols, M. Marcé, A.M. Guergué, M.A. Santos (Barcelona, Spain) 15–22

Relationship between apoplastic ascorbate regeneration and the stimulation of root growth in *Allium cepa* L.
J.A. González-Reyes, F.J. Alcaín, J.A. Caler, A. Serrano, F. Córdoba, P. Navas (Córdoba and Huelva, Spain) 23–29

Detection and purification of modified leghemoglobins from soybean root nodules
H.-K. Jun, G. Sarath, F.W. Wagner (Lincoln, NE) 31–40

GENETICS AND MOLECULAR BIOLOGY

Molecular cloning and characterization of a cDNA encoding a small GTP-binding protein related to mammalian ADP-ribosylation factor from rice
H. Higo, N. Kishimoto, A. Saito, K. Higo (Ibaraki and Kumamoto, Japan) 41–49

Cloning and characterization of a repetitive sequence in rye (*Secale cereale*)
L. Mao, W. Zhai, H. Hu, L. Zhu (Beijing, People's Republic of China) 51–57

Phenotypic characterization and classification of nodulation mutants of pea (*Pisum sativum* L.)
M. Sagan, T. Huguet, G. Duc (Dijon and Castanet-Tolosan, France) 59–70

Cucumber mosaic virus protection in transgenic tobacco plants expressing monomeric, dimeric or partial sequences of a benign satellite RNA
L. Peña, J. Trad, J.R. Díaz-Ruiz, P.B. McGarvey, J.M. Kaper (Madrid, Spain; Beltsville, MD) .. 71–81

CELL AND TISSUE STUDIES IN VITRO

Studies on an inhibitor of TMV viral antigen accumulation released by cultured cells of *Nicotiana tabacum*
T. Takahashi, G.S. Warren (Sheffield, UK) 83–96

A comparative study on mode of culture and plant regeneration from protoplast-derived somatic embryos of two genotypes of *Asparagus officinalis* L.
S. Mukhopadhyay, Y. Desjardins (Québec, Canada) 97–104

GENERAL

Genotype difference in rice postgermination growth under hypoxia
M. Yamauchi, P.S. Herradura, A.M. Aguilar (Manila, Philippines) 105–113

Announcement 115

REVIEW ARTICLE

Compilation of plant 5S ribosomal RNA sequences on RNA and DNA levels
M.Z. Barciszewska, M. Szymański, T. Specht, V.A. Erdmann, J. Barciszewski (Poznań, Poland; Berlin, Germany) 117–128

PHYSIOLOGY AND BIOCHEMISTRY

Influence of ATPase activity on PPi dependent H^+-transport in tonoplast vesicles of *Acer pseudoplatanus*
A. Fraichard, C. Trossat, T. Magnin, A. Pugin (Besançon and Dijon, France) 129–138

Reduction of extracytoplasmatic acceptors by roots of *Plantago lanceolata* L. Evidence for enzyme heterogeneity
W. Schmidt (Oldenburg, Germany) 139–146

Relationships between leaf temperature, compatible solutes and antitranspirant treatment in some desert plants
S. Laurie, M. Bradbury, G.R. Stewart (Herts, UK; Muscat, Oman; Queensland, Australia) 147–156

Eucalyptus root and shoot chitinases, induced following root colonization by pathogenic versus ectomycorrhizal fungi, compared on one- and two-dimensional activity gels
C. Albrecht, P. Laurent, F. Lapeyrie (Champenoux, France) 157–164

GENETICS AND MOLECULAR BIOLOGY

Unlike in other monocotyledonous plants such as wheat and rice, the region containing the $tRNA^{Gly}$ (UCC), $tRNA^{Arg}$ (UCU) and CF_1 ATPase α-subunit genes has not undergone recombination in the leek chloroplast DNA
V. Tabidze, M. Kartvelishvili, A. Jincharadze, T. Beridze (Tbilisi, Republic of Georgia) 165–169

Factors influencing transient gene expression in electroporated tall fescue protoplasts
R.V. Penmetsa, S.-B. Ha (Blacksburg, VA) 171–178

Investigations of the coxII intron structure in the mitochondrial genomes of angiosperms
M. Albrizio, L. De Gara, C. De Benedetto, O. Arrigoni, R. Gallerani (Bari, Italy) 179–186

The TATA box binding protein 1 (TBP 1) of maize displays promoter specific DNA binding affinities
M. Haaß, E. Grieß, M. Goddemeier, J.-M. Egly, G. Feix (Freiburg, Germany; Strasbourg, France) 187–194

CELL AND TISSUE STUDIES IN VITRO

Induction and characterization of embryogenic callus types for the initiation of suspension cultures of leek (*Allium ampeloprasum* L.)
J. Buiteveld, P.F. Fransz, J. Creemers-Molenaar (Wageningen, The Netherlands) 195–202

Plant regeneration from protoplasts isolated from suspension cultures of leek (*Allium ampeloprasum* L.)
J. Buiteveld, J. Creemers-Molenaar (Wageningen, The Netherlands) 203–210

Regulation of starch and protein accumulation in alfalfa (*Medicago sativa* L.) somatic embryos
F.-M. Lai, B.D. McKersie (Ontario, Canada) 211–219

Fertile plant regeneration from protoplasts of a seed-propagated cultivar of *Lilium* × *formolongi* by utilizing meristematic nodular cell clumps
M. Mii, Y. Yuzawa, H. Suetomi, T. Motegi, T. Godo (Chiba, Japan) 221–226

Book review 227–229
Announcement 231
Subject index 233–236
Author index 237
Volume contents 239–240
